GROSAVE APP

The objective of this app is to minimize food wastage from domestic level by preventing the wastage of grocery items. The wastage of grocery items simply due to our negligence leads to expiry of the unused products leading to unnoticed economic losses, which have actually turned out to be in millions of dollars across the globe. So, this app would keep a systematic record of grocery and notify the user about the proper utilisation of food items within their period of shelf life to avoid the unnecessary squandering of money and food.
