Nature speaks.....

We should all step out of our dreary world to experience the joys and bounties of nature. Poetry and nature go hand in hand and make for a delightful combination when we're learning new vocabulary and enhancing our creativity and expressions. Let us help our children connect with the natural environment by learning a short nature-themed poem. The students can learn any poem about nature, forests, the sea, clouds, trees, flowers , animals etc. They will memorize the poem, and then write it on an activity sheet illustrating it with a picture.

After completing it, click a clear picture of the activity sheet and upload it on a slide in the integrated PPT that you are making.
